

AUT REN 001: Rental of test equipment

The following test equipment can be rented with related software applications:

- AUT HW 001 Temperature Data Logger for oven validation
- AUT HW 002 Grid for oven validation
- AUT HW 005 4G10 4 Channels Signal Generator
- AUT HW 006 VIHM Voltage Inter-harmonic Meter
- AUT HW 007 CIHM Current Inter-harmonic Meter
- AUT HW 008 3V30 3 Channels Analog Input
- AUT HW 009 3PQA Three Phase Power Quality Analyzer
- AUT HW 888 Automatic Data Acquisition System (contact us to understand the available models)
- AUT HW 999 Hardware Custom

For a full description of each item, please refer to our suite of Automation materials, Italy.UL.com or contact us. For special requirements, contact us to speak to an advisor.

Terms of sale and software license

- The software is supplied on a DVD or USB Key containing the installation program.
- Technical documentation is included (user manual, installation manual, other applicable documents)
- The software license allows you to install applications of acquisition / control on a single computer. In case the software is moved to an alternative computer, you will need to contact UL to move the license. Applications of data processing (Editor, Analysis and viewing/printing) may be installed on multiple PCs
- Software updates are free of charge for one year from the date of order
- Includes Installation, testing and training of the software at your location (half day)
- Free telephone technical support (including remote assistance)

Terms of sale and rented hardware

- Dedicated "Laboratory Equipment Use Agreement" contract
- Mandatory Technical Training and Safety Precaution
- Annual Maintenance and Calibration included in the renting contract
- For installed software, see terms above
