- ACCREDIA DT-02-DT
- EUROLAB Technical Report No 2/2006

Why: Validation purposes

Support: Reference documents

What: Software categories

How: Validation procedure

When: When validation is required

History: Keep track of SW modifications

AUT TRA 002 Software Production Guide

- Create quality procedures for software production, according to ISO 9001
- How to arrange code, documentation and procedures
- Establish metrics for software product

AUT TRA 003 Qualification Final Test

- For training a final test to verify the competency during the training
- Issue of a certificate with 2 years validity for UL

AUT SRV 001 on site validation of UL software sold.

AUT SRV 002 on site validation of commercial software.

AUT SRV 002 on site validation of custom software.

- We offer a consultancy service for software validation, which is a process that needs to be done on-site with the user. The purpose is to confirm the suitability of the product in the operating unit in which is used (computer, network, access rights, external hardware, other software possible interference) to confirm the validity of the application in the context and for the purpose it is adopted.
- The same services are available for commercial software as for example Agilent Datalogger for Temperature recording and Yokogawa acquisition system, Software for EMC Testing, excel spreadsheet with formula.
- It is also possible to require the validation of custom software developed by a third party.
- Issue of a validation procedure and certificate
